 AB - JP2004191681 NOVELTY - A movement mechanism (36) moves a display board (14) to display position (A) in which a target object (20) e.g. cup is displayed, and conceal position (B) in which the target object is concealed. When the target object is displayed or concealed, the target object fragments (22) are hidden from a field of view or displayed, respectively.  
 - USE - E.g. LCD device for game machine such as pachinko machine, slot machine and shooting game device.  
 - ADVANTAGE - A drive unit is simplified and hence the size of the display device is reduced.  
 - DESCRIPTION OF DRAWING(S) - The figure shows a side view of the display device.  
 - display board 14  
 - display target object 20  
 - target object fragments 22  
 - movement mechanism 36  
 - cam engagement unit 46  
 - releasing unit 64  
 - display position A  
 - conceal position B
